

Resolution 2015-3
Establishment of an Ad Hoc Committee to Recommend an
ADA Accessible Port of Illahee Meeting Space

Whereas the Port of Illahee's meetings are public meeting and open to the public and are to be held at a location that is accessible to all interested people, including those with disabilities, and

Whereas the Port of Illahee is currently holding their meetings in a facility that is not ADA accessible, and

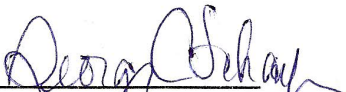

Whereas there are regular attendees who are eligible for ADA status and who have complained unofficially about the difficulties they have accessing the Port's current meeting space, and

Whereas at some point the attendees may reach a point where they will need to officially request the Port hold its meetings in a more assessable location, and

Whereas at that point the Port would need to change the location of its meetings to accommodate them, and

Whereas it is better to be proactive and determine what meeting space alternatives there may be before a complaint is officially filed,

Therefore request the establishment of an ad hoc committee consisting of at least one Port Commissioner and ~~three to five~~ ^{REPRESENTATIVE} community members to recommend an ADA accessible meeting space to the Port commissioners.
