IRRIGATION/NON CHEMICAL

Dear Customer:

North Perry Avenue Water District's (NPW) cross connection record's show that your backflow prevention assembly (ies) is due for it's annual testing. This test is required by NPW's Cross Connection Control Program and the Washington State Department of Health (WSDOH).

A successful test of your assembly must be completed by a WSDOH licensed tester. An approved list of tester's can be found on our website at [www.northperrywd.org](http://www.northperrywd.org). A copy of the test result's need's to be received, by NPW's district office, by the test due date listed above.

If you require a copy of your assembly's test result's, please request one from your tester.

\*\*\*We are currently in the process of updating our backflow assembly record's and request you send current contact information including: e-mail, contact name, organization, address and phone to [c.little@northperrywd.org](mailto:c.little@northperrywd.org)\*\*\*

If you have question's please contact me, by email or phone.

Your prompt attention concerning this matter is appreciated.

Regards,

A handwritten signature in blue ink, appearing to read "Courtney Little", is written over a light blue rectangular background.
